The lights on First St were rewired and replaced with LED lights. The lights on Second and Third have not been replaced or rewired. You might check with Yukio or James. I think the Tiger grant had money to replace some lights to LED. I'm not sure how many or when they are scheduled for replacement. Ted Tanaka had asked about the First Street lights.

They don't look like LED lights!

Mike,

I asked our safety patrol officers to take an inventory of the number of lights that are out in Little Tokyo. A total of 35 were observed and documented with photos and a description of where the broken lights are located.

Joella in Councilman Huizar's office has requested this information from all the BIDs in an effort to try and force the Bureau of Street Lighting to take action.

You can tell by the photos that there are three different types of lights, so the type of light doesn't seem to make a difference.
